Stir up your pure minds
By way of remembrance". Even pure minds needs stirring up lest they forget and become remiss in their obligations as church members. We are so constructed that we must not only be informed of opportunities, but must also be urged to act.

A couple attended a Sabbath School service not long ago on Investment Day. They planned to give nothing but, the short investment program was so interesting this couple gave $10. THEY left feeling good that they had been led to give. Yes, we need some reminding and urging sometimes. One of our great commissions of the year is about to come to a close, our minds have been stirred up. It is good that this is over for from Inspiration finds alone more than $7 million comes in annually for our world program. As we look over the world and think of what decision and giving and consecrating has accomplished for the work of God we ascribe to him all the glory and praise his name.

We the church of Appomattox also desire to thank all who gave to this great cause and for the many pleasant contacts while calling in your home not only here in Appomattox County but also in the adjoining counties. We wish all who read this article a happy and successful New Year. May God's blessings rest upon you in 1963.

Korea Report

Mr and Mrs. R. B. Haley, Sr., Appomattox received a holiday message from their niece, Mrs. Kenneth E. Boyer, which they believe may be of interest to many readers. Mrs. Boyer has been a teacher at Montreat College, Montreat, N.C. and received her education at the University of Va., Duke University, and Montreat College.

Part of the Boyers' letter follows:

"The highest mountain in South Korea is an extinct volcano on Cheju Island. This mountain, visible from most of the island, has a mystic beauty that stirs the hearts of the islanders with awe and pride. It is a landmark to which they attach all the sentiments of home. During a two week stay on the island last month Kenneth was visiting in some twenty churches of which he is moderator and I was holding a clinic for Public Health work; it was easy to understand how the people could be so attached to Hal-la-san.

Even so, this mountain is so famous a peak to those people, our Christmas Season is one of the Peaks of the year. To the Christian it is a time of joy and worship, a time when the love and warmth of church, family and home fellowship are paramount.

Here in Korea, we look forward to a time for family reunion for the Holiday season. It will be a time of rest from the heavy demands of full immersion and will also be the first Christmas for our son, Timothy, who will be seven months old. I am particularly thankful for the many thoughtful gifts from White Cross from the Women of the Church that contributed so liberally during the Lenten year. It is our prayer that, because of your gifts, Christ has made it possible for us to witness for you in Korea, many may come into a fuller knowledge of the Love of God and the full significance of this Christmas Season.

Sincerely yours,
Sylvia and Timothy Boyer

Health Director Reports Seven Hepatitis Cases

Seven cases of hepatitis have been reported in Appomattox County in the past three months. Dr. Francis J. Clements, county health director said Monday. Three of the seven cases were discovered during the last two weeks of December.

Supplies of gamma globulin, a blood derivative, have been furnished to the county health department by the Red Cross, he said. Shots are being given to treat family members of hepatitis victims, and others who have been exposed to the disease.

The Health Department's supply of gamma globulin is used to treat persons who do not eat it through private physicians and for "medically indigent" patients, Dr. Clements said. Gamma globulin is relatively expensive, he added. It is used to prevent hepatitis and to lessen the effects of the disease.

Hepatitis is described as an inflammation of the liver.

How to Prevent Disease

Dr. Clements said, "If he chooses us to have a safe water supply" to prevent the acquiring or spread of hepatitis, "we explained that even the waste waters from washing machines, if dumped on the ground, can be the source of further contamination.

All human wastes, he said, should be treated in an "approved manner."

Who's Spreading?

We feel sure one or more than one person — probably undiagnosed — is spreading the disease," Dr. Clements said.

He said he would not term the seven cases an epidemic, although the number is "above the average" for a rural community.
